

***probe*2101**

Hand Held Metal Detectors

Operation

The Probe 2101 is the latest metal detector in the Saflec range. The Probe has a unique style and is designed for easy operation. We at Saflec have studied hand held detectors over the years before committing ourselves to building one.

The parts normally affected by abuse are the switch and the buzzer.

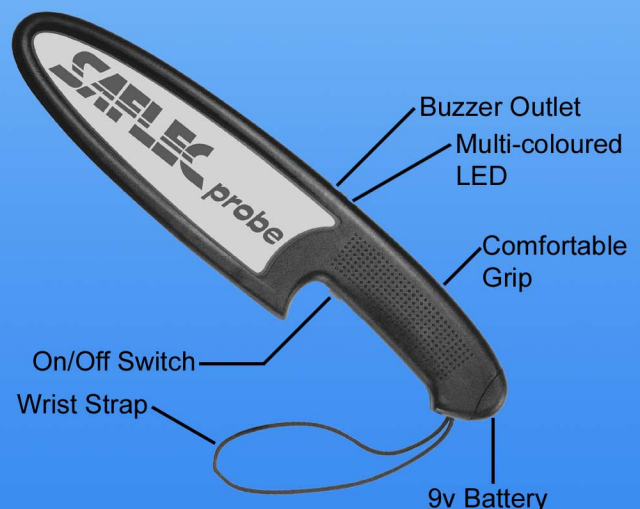

The switch in the Probe 2101 has a manufacturers life span of 10 million operations.

The buzzer cannot be tampered with as preventative measures have been taken in the main body of the detector.

A three colour LED which indicate the presence of metal, low battery condition and detector in operation.

Accessories

The detector is supplied with a 9v dry battery but a rechargeable battery and charger are available as an optional extras.

Technical Data

Supply Voltage: 9v Battery
Operation Frequency: 30-40kHz
Audio Frequency: 2.7kHz
Weight: 330g
